## Framework

Health Belief Model

#### Susceptibility

"Could I actually get HPV"
Perceived risk of getting the infection.

#### Severity

"It's not just a virus, it's the risk of cancer." Understanding the link to serious risks, like cancer.

#### Benefits

"This shot will protect me!"
Advantages of vaccine in preventing infection and related cancers.

#### Barriers

"Ugh, but it's expensive and hard to book.." Concerns about cost, access, and side effects.

## Actionable Insights

Tailored Strategies

## Text-based Platforms

Ideal for rapid debunking and policy clarification

## Audio-based Platforms

Best for in-depth education and building trust.

### Video-based Platforms

Powerful for emotive storytelling and fostering empathy.

## Hear the Difference!

## Background

- Although the HPV vaccine is highly effective, vaccination rates remain **low** in regions like **China**.
- The public primarily gets health information from social media, yet the impact of **different modalities** (text, audio, video) is often overlooked.

#### **Our Questions:**

- **RQ1**: How do text, audio, and video modalities **differ** in discussions of HPV vaccination's susceptibility, severity, benefits, and barriers?
- **RQ2**: What are the representative **topics** in HPV vaccine discussions across text, audio, and video?
- RQ3: How do emotions expressed in HPV vaccine discourse vary across modalities?

## Methodology: Decoding the Voices

73,357 posts (Weibo) 1,228 podcasts (Ximalaya)

1,225 videos (Douyin)

Text

Audio

Video

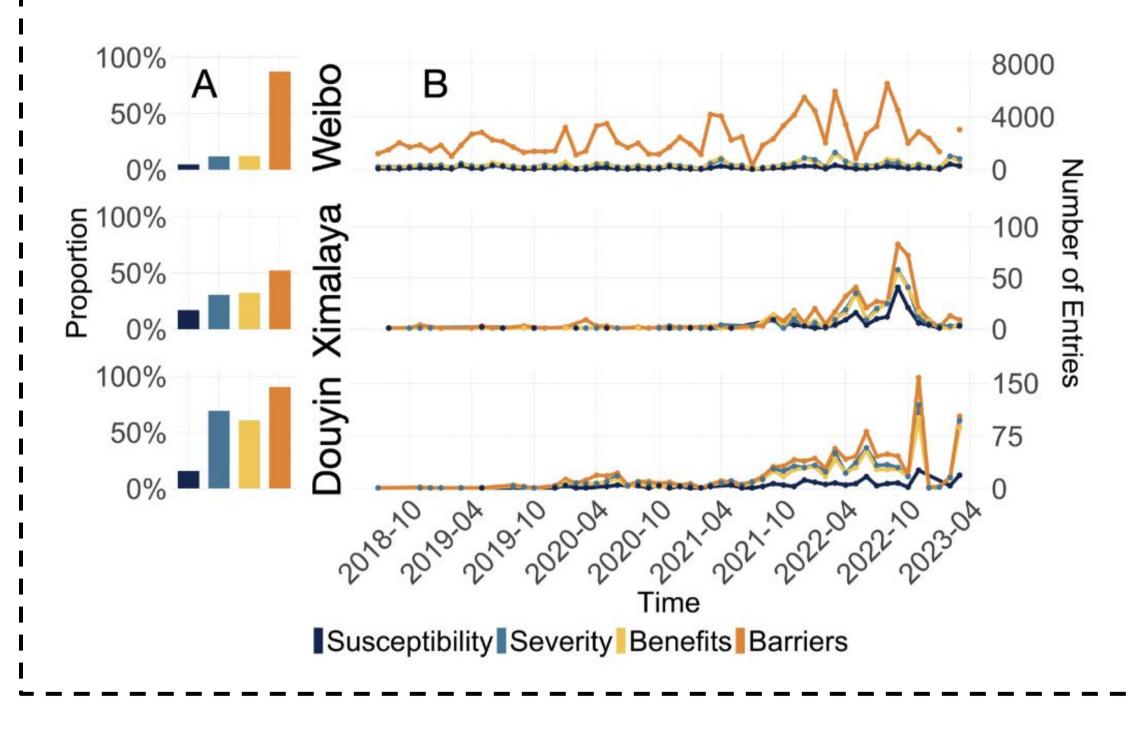

We used the Health Belief Model (HBM) to analyze the public's discourse about the HPV vaccine.

- Multimodal Data preprocessing: Human Voice-to-Text Transcription
- Data Coding Under Health Belief Model Four dimentions
- BERTopic Analysis, Emotion Analysis and Trend Analysis

## 11C5u

## RQ1:Text, Audio, and Video Differ in HBM Dimensions

- Text-based platform (Weibo): Focuses primarily on barriers.
- Audio-based platform (Ximalaya): Offers a more balanced discussion.
- Video-based platformDouyin (Douyin):
   Focuses on barriers, severity, and benefits,
   often through personal stories.

#### Results

# RQ2: Representative Topics in HPV Vaccine Discussions Across Modalities?

- Text-based platform (Weibo): Spotlight policy-level issues.
- Audio-based platform (Ximalaya): Delve into discussions of elighbility, safety, or industry aspects.
- Video-based platformDouyin (Douyin): Emphasize personal stories, everyday experiences, and quick recommendations.
